# PRESCOT URBAN DISTRICT COUNCIL.

---

The Chairman and Members of the  
Prescot Urban District Council.

Ladies and Gentlemen,

I have the honour to submit to you my Annual Report on the health of Prescot Urban District for the year ended 31st December, 1963.

I am happy to report that the health of the community has remained satisfactory during the year.

The adjusted death rate at 15.6 per thousand compares not unfavourably with that for England and Wales (12.2).

The birth rate of 20 per thousand shows an increase compared with the previous year (18.4). It was higher than the rate for England and Wales (18.2).

There was an increase in infant mortality, 5 deaths being recorded as against 3 during the previous year. All these deaths occurred before the age of one month.

The incidence of infectious disease showed a decrease compared with the previous year. There were more cases of scarlet fever and whooping cough, but fewer cases of measles. No cases of poliomyelitis were notified and there were no cases of diphtheria. Only 3 cases of tuberculosis were notified.

During the year continued attention was given to the problem of sub-standard property and in consequence 26 houses were demolished.

I should like to take this opportunity of expressing my appreciation for the assistance I have had from all members of the Council and in particular Mr. C. J. Hulme.

I am, Ladies and Gentlemen,

Your obedient Servant,

F. W. BUNTING

# PRESCOT URBAN DISTRICT COUNCIL.
